## EDUCATION

### York University

Honours Bachelor of Science in Computer Science

Expected Dec 2026

Toronto, ON

**Courses:** Software Design, Data Structures, Database Systems, Computer Organization, Object-Oriented Programming

## EXPERIENCE

### Technical System Analyst

Sep 2025 – Dec 2025

Royal Bank of Canada

Toronto, ON

- Supported cloud application reliability across Azure, AWS, and Databricks by monitoring pipelines, troubleshooting deployment issues, and maintaining system stability
- Automated infrastructure configuration and deployment using Terraform, improving consistency and reducing manual setup time across environments
- Collaborated with the Cloud Support team to analyze and resolve production incidents, enhancing application uptime and operational efficiency
- Coordinated with cross-functional teams to test and validate new deployments, ensuring adherence to RBC's cloud governance framework

## PROJECTS

### AI Content Generator SaaS | *React, TypeScript, Tailwind CSS, Supabase(PostgreSQL), Stripe, OpenAI API*

- Developed a SaaS website using **React**, **Shadcn**, **Tailwind CSS** for frontend, and backend in **TypeScript**, integrating open-source AI APIs for generating images, audio, code snippets, and conversations
- Implemented user authentication with **Clerk**, payment processing with **Stripe**, and customer support with Crisp chat, utilized **Prisma for PostgreSQL** to track user usage
- Executed API requests with **Axios** to interact with **ChatGPT 3.5-turbo**, **DALL-E**, and **Replicate AI**

### Media Storage Hub | *Angular, TypeScript, AWS, Amplify*

- Developed a web app for the storage of media files, featuring exportation with unique identification tags
- Leveraged **AWS services including S3, Lambda, and DynamoDB** for storing, retrieving, and tracking of media files with external metadata
- Employed **AWS Amplify** for user management, while integrating Amplify CLI for efficient **CI/CD** workflows
- Crafted a responsive UI with **lazy loading** while ensuring efficient application state management with NgRx

### Smart Pantry Tracker | *React, JavaScript, Firebase, OpenAI API*

- Built a dynamic pantry tracker using **React** and **Material-UI**, leveraging **Firebase** for real-time database management and state synchronization
- Integrated **OpenAI ChatGPT-4o mini** API to suggest recipes based on available pantry items, enhancing user experience with personalized recipe recommendations
- Implemented user-friendly search functionality and item quantity adjustment features, including seamless add, remove, and update operations for pantry items

## LEADERSHIP

### Event Manager - Model United Nations | *Jubail International School*

Oct 2021 - Feb 2022

- Managed a team of individuals to communicate, coordinate and execute a in person event, attracting over 150 attendees
- Designed and implemented a structured leadership framework, defining clear roles and responsibilities for team members, improving overall team efficiency.
- Assisted and facilitated various event planning activities, attending meetings to set goals, track progress, and manage resources, ensuring the smooth execution of the MUN event

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, TypeScript, SQL, PostgreSQL, HTML, CSS

**Frameworks:** React, Angular, Next.js, Tailwind CSS, Node.js

**Developer Tools:** Azure, AWS (Amplify, DynamoDB, S3, Lambda), Terraform, Jenkins, Git, IntelliJ
